

**Geology**  
by SABINE HILL

nature MOVES us . . . nature INSPIRES us

The GEOLOGY collection uses an old free-form technique, where no pattern exists and a simple flick of the wrist can have an incredible impact on how the finished tile looks. With nature as his muse, the tile maker becomes the artist, letting color flow, creating beautiful unique pieces.

Inspiration is our guide.

*Beauty . . . Peace . . . Wonder*

9 colorways / available in all shapes + sizes.
